

Assignment:4

by
Rajendra Dhakal, Ph.D.
Department of Computer Science & Engineering
Sejong University
2022

Guidelines (Deadline: 2022-06-7)

1. Complete the assignment and upload to black board within the deadline.
2. Clearly mention your name and student ID.
3. **Do not copy from other friends.** If found 0 marks will be given.
4. **Do not submit the blank file.** If found will get the demerit point.
5. Submit all the problems in single file (.docx).
6. The file should contain the **source code along with the output screen.**
7. Use the comment option to explain your code.
8. The solution should be exactly match to the question.
9. If you have any question do not hesitate to inbox me.

Question:1

Use Dynamic memory Allocation concept. Assume any condition if needed by yourself.

- To allocate the memory by using new operator
- Input the size of array at run time and allocate the memory
- Also, check whether the memory has been created or not using exceptional handling concept
- Display the input data
- Ultimately, deallocated the memory using delete operator

Question: 2

- Use `std::array` concept to solve the following problem.
Assume any condition if needed by yourself.

	C++	Physics
Student A	20	100
Student B	70	36
Student C	30	50

- 3 students' C++ and Physics scores
- Declare a 2 dimensional array and initialize it
- Compute the average of C++ and Physics scores

Thank you
